Department School of Information and Communication Technologies [2021 – Current]

City: Belgrade

Country: Serbia

Website: <https://en.ict.edu.rs/>

Computer technician

Tehnicka skola [2017 – 2021]

City: Smederevo

Country: Serbia

PROJECTS

Find Your Job

[Feb 2024 – Current]

I developed a project titled 'Find Your Job' using Laravel, one of the most popular PHP frameworks. This project aims to streamline the job search process through an intuitive interface. I utilized Eloquent ORM for efficient data management and modeling within the application, enabling quick data manipulation in the database. Through this project, I gained a deeper understanding of the MVC architecture and routing concepts in Laravel, which are essential for building robust web applications. Working on this project provided me with an opportunity to enhance my skills in Laravel development and familiarize myself with best practices in PHP application development.
